SKILLS

- Python
- Machine Learning
- Deep Learning
- Generative AI
- Large Language Models
- Automation
- Full-Stack Development
- Trading Systems
- REST APIs
- Database Design

LANGUAGES

English
Professional Working Proficiency

Urdu
Native / Pashto

Available for collaborations and AI/ML projects worldwide.

PROFILE

Self-taught AI/ML engineer with 3+ years of hands-on experience building intelligent systems. Currently completing secondary education while designing and shipping production-grade AI-powered products. Specialized in autonomous trading systems, multi-model AI routing platforms, and full-stack applications. Passionate about leveraging Python, deep learning, and generative AI to create automation solutions that deliver real-world impact. Proven ability to learn rapidly and ship end-to-end projects independently.

3+

YEARS EXPERIENCE

10+

PROJECTS SHIPPED

AI

FIRST MINDSET

EXPERIENCE

- Independent Builder** 2024 — Present
Self-directed / Freelance
Designing and shipping AI-powered products from concept to deployment. Built an autonomous trading bot with signal processing and risk management, a multi-model AI router for optimal LLM selection, and a full-stack restaurant management platform with ordering and admin dashboards.
- Self-taught AI / ML Engineer** 2022 — Present
3+ years of independent learning
Built strong foundations in Python programming, then progressed into machine learning, deep learning, generative AI, and intelligent automation. Developed expertise through continuous building, breaking, and shipping hands-on projects end-to-end.

FEATURED PROJECTS

- Autonomous Trading System** Python ML APIs
Fully automated trading bot that reads market signals, executes trading strategies, and manages risk without manual intervention.
- Multi-Model AI Router** GenAI LLMs Routing
Intelligent platform integrating multiple AI models that routes user prompts to the best-suited model for highest-quality output generation.
- Restaurant Management App** Full-Stack Web Database
End-to-end restaurant platform featuring customer ordering flow, dynamic menu management, and comprehensive admin dashboard.

EDUCATION

- Matriculation (Class 10)** In Progress
Swat, KPK, Pakistan
Completing secondary education while building production-grade software and AI systems in parallel through self-directed learning.

KEY HIGHLIGHTS

- > Self-taught engineer with demonstrated ability to build and ship production systems independently
- > Hands-on experience across the full AI/ML pipeline from data processing to model deployment
- > Built and deployed 10+ projects spanning AI, automation, web development, and trading systems
